

Ngwanatuka Moses Molepo

Software Developer

Summary

Enthusiastic and results-driven Software Developer with hands-on experience in building web applications, APIs, and client-server systems. Currently studying at WeThinkCode_, with a focus on Java, Python, and full-stack development, and previously completed the ALX Africa Software Engineering Program specializing in React and LAMP stack. Skilled in designing and testing solutions using Test-Driven Development (TDD), and passionate about developing scalable digital products and SaaS solutions. Seeking opportunities to contribute to innovative teams and grow as a full-stack engineer.

Core Competencies

- Core Technical Skills
 - Front-End: React, JavaScript (ES6+), HTML, CSS/SCSS, Redux
 - Back-End: Python, Java, C (basic), Flask, LAMP stack fundamentals
 - Databases: MySQL, MongoDB, SQLite, SQLAlchemy
 - DevOps & Tools: Git/GitHub, CI/CD (basic), Linux, Terminal Navigation, Vim
- Other Skills
 - Strong problem-solving and debugging
 - Test-Driven Development (TDD) & Unit Testing
 - Networking fundamentals
 - Agile development methodology
 - Time management

Education

WeThinkCode_ (2024 – Present)

- Java, data structures, algorithms, networking, and system design.
- Collaborative team projects following Agile methodology.

ALX Africa (Mar 2023 – Mar 2024)

Software Engineering Program

- Front-End Development with React and LAMP stack foundations.

Work Experience

Bolt Driver (2021 – 2022)

- Delivered high-quality customer service with consistent 5-star ratings.
- Developed transferable skills in communication, problem-solving, and time management.

Projects

Budget Tracker Web App (Flask, SQLAlchemy, Chart.js, Bootstrap)

- Designed a personal finance tracker with user authentication and authorization, transaction analytics, and dark mode UI.
- Integrated database persistence (SQLite) and analytics visualization.

Robot World Simulation (Java)

- Implemented a multi-client server and robot simulation system with socket programming.
- Designed client-side commands, JSON-based communication, and unit testing.

E-Commerce Web App – Jewellery Store (React & Node.js)

- Developed a modern e-commerce site for a freelance client.
- Implemented product listings, shopping cart, and user-friendly UI.

SaaS Initiative – Form Digitization Tool (In Progress)

- Building a flexible platform to digitize occupational therapy forms starting with the Beck Depression Inventory.
